#### 1. Qualitative information on quarterly financial results

#### (1) Business results information

The global economy in the period under review proceeded largely on a recovery path. In the US, despite some negative effects from the large hurricanes in August and September, business conditions remain poised for steady growth centered on manufacturing. In Europe, with receding political uncertainty after the passage of elections in key countries, the economies of EU countries have kept on a rebounding trend. The Chinese economy has steadied its descent to a moderate pace, aided by public infrastructure investments and other fiscal policy support, while measures to reign in property investment and adjust excess facilities continue. Benefiting from these trends in overseas economies, the Japanese economy, too, has been growing at a robust pace. With production on the rise at manufacturing companies, personal consumption has been rebounding on the back of improvements in employment and household incomes.

The market for electronics relevant to Seikoh Giken group has been seeing AI (artificial intelligence) and IoT (Internet of Things) technology applications make further inroads into a range of industrial fields. In car electronics, IoT has enabled connected technologies that bring unprecedented comfort to driving environments and has led to rapidly advancing technology development aimed at achieving the commercial viability of self-driving vehicles. The spreading of IoT has been promoting the evolution of communications environments that permit the effective use of big data. In the information and telecommunications-related sector, this has spurred large-scale data center construction and 5G technology development efforts aiming at the commercialization of the 5th generation of ultra-high speed broadband cellular network standard.

In this setting, Seikoh Giken group continued with the implementation of measures set out in its medium-term management plan "Masterplan 2016," initiated in the previous fiscal year, namely, (1) strengthening the earning power of existing businesses, (2) optimizing the business portfolio, and (3) reinforcing the management base.

(1) In order to strengthen the earning power of existing businesses, Seikoh Giken worked to boost sales capabilities and price competitiveness both at the Precision Machinery Business (with main products in precision molded products, molds, and precision processed metal parts, etc.) and at the Optical Product Business (with main products in optical communication components, related equipment, and optical transmission units, etc.) and promoted in both businesses the development of new products and new technologies.
(2) With a view to optimizing the business portfolio, Seikoh Giken group further increased its equity stake in France-based measurement instrument manufacturer DATA PIXEL SAS, and in order to expand the business areas of Seikoh Giken group changed the status of the DATA PIXEL SAS from an equity-method affiliate to a consolidated subsidiary. (3) Efforts to reinforce the management base surrounded strengthening the governance systems of subsidiaries and creating group frameworks to facilitate synergy effects for future endeavors.

As a result of these measures, second-quarter consolidated sales posted 6,721,590 thousand yen (7.4% compared with the year-earlier period). As to earnings performance, mainly due to weak sales of high-margin products, operating income decreased 31.4% from the year earlier period to 450,366 thousand yen and ordinary income fell 27.3% to 484,755 thousand yen. Net income for the quarter attributable to shareholders of the parent company posted 540,994 thousand yen, up 27.2% from the year-earlier period, due to an extraordinary gain resulting from the phased acquisition of additional equity in DATA PIXEL SAS.

Segment performances developed as follows.

#### (i) Precision Machinery Business

The Precision Machinery Business has been stressing efforts to increase sales of precision molded products. In the period under review, activities involved showcasing the products of Seikoh Giken group on the corporate website, increasing opportunities for contact with new customers, and nurturing the contact with new customers after first trade inquiries. At the same time, efforts continued to clear technical problems in preparation for the volume production of molded products. Along with these efforts, the Precision Machinery Business worked on applications for technologies developed since the time of the founding of Seikoh Giken for precision molds,

thin-wall molding, and micro-transfer, and pushed ahead with the development of high added-value precision molded products for new markets such the healthcare and bio-sciences. In automotive molded products, along with the shift of production from the existing factory in Shizuoka prefecture to the newly set up factory in Chitose city, Hokkaido prefecture, research was conducted surrounding the viability of the volume production of new automotive molded products using the vacated space at the Shizuoka factory. Although sales of metal pressed molded products for electronic components rebounded in the second half of the period under review, sales for the period overall declined compared with the robust sales performance in the year-earlier period. Based on the foregoing, sales at the Precision Machinery Business posted 3,744,359 thousand yen (down 2.9% compared with the year-earlier period). Reflecting lower sales of high-margin metal pressed products, operating income marked 235,282 thousand yen (down 46.1% compared with the year-earlier period).

#### (ii) Optical Products Business

The Optical Products Business benefited from rapidly growing data volumes transmitted over the Internet driving active growth in facility investment such as global communication networks and data centers for the processing and storage of large data volumes. With the demand trend for optical communication components on the rise, this year in April, Seikoh Giken group acquired additional equity in France-based DATA PIXEL SAS, the global top brand in inspection and measurement instruments for optical communication components. Seikoh Giken group has since added DATA PIXEL SAS to its consolidated subsidiaries. Additionally, the Optical Product Business came to market with new products such as compact high-functionality optical connectors designed for efficiently connecting optical fiber in confined spaces, in addition to polishing machines with enhanced operating performance for polishing the end planes of multi-core optical connectors. As a result, sales at the Optical Products Business in the period under review posted 2,977,230 thousand yen (up 23.8% compared with the year-earlier period). Although sales of measurement and inspection instruments increased due to the integration of DATA PIXEL SAS as a consolidated subsidiary, sales of high-margin optical transmission units declined, with operating income marking 215,084 thousand yen (down 2.3% from the year-earlier period).

#### (2) Financial status information

Consolidated total assets at the end of the period under review marked 25,631,980 thousand yen, reflecting an increase of 605,856 thousand yen from the end of the previous fiscal year. Current assets increased 367,762 thousand yen to 15,321,900 thousand yen compared with the end of the previous fiscal year. The main factor was a rise in notes and accounts receivable-trade on the back of higher sales and the consolidation of DATA PIXEL SAS. Non-current assets rose to 10,310,079 thousand yen, a gain of 238,093 thousand yen from the end of the previous fiscal year. The main factors were additional machinery and equipment installations for future production increases and a rise in goodwill from the consolidation of DATA PIXEL SAS.

Consolidated total liabilities at the end of the period under review marked 3,771,678 thousand yen, reflecting an increase of 313,097 thousand yen from the end of the previous fiscal year. The main factor was a rise in accounts payable-trade for materials, etc., due to higher sales and related to the consolidation of DATA PIXEL SAS.

Consolidated total net assets at the end of the period under review marked 21,860,301 thousand yen, reflecting an increase of 292,759 thousand yen from the end of the previous fiscal year. The main factor was a rise in retained earnings.

#### (3) Consolidated results projections and other forward-looking information

Consolidated financial results projections for the fiscal year ending March 2018 are largely consistent with current performance and remain unchanged from the consolidated financial results projections for the full fiscal year announced in the summary of financial statements released on May 12, 2017.
